

P.C.I use increases drug revenue at Spire Healthcare

Spire Bushey Hospital has seen a substantial increase in their drug revenues since introducing **Quantum Air Technology's** Portable Compliant Isolator (P.C.I) into their busy aseptic suite. The P.C.I is the only portable fully compliant isolator in the market and the extra capacity and flexibility that it brings to the pharmacy has been capitalised on fully at this hospital near London.

Corinne Ruck, Pharmacy Manager at Spire Bushey Hospital said:

"We have had the isolator in use since April 2008 and have been more than delighted in the design and function of this piece of equipment. We find the ease of introducing the drugs via the hatch really useful and the positioning of the gloves and sleeves suit all our users. The purchase of the electric trolley was also very beneficial especially as our operators come in all shapes and sizes!

We have used the isolator solely to reconstitute monoclonal antibody products such as trastuzumab (herceptin) and bevacuzumab (avastin) and for this purpose the design is perfect. It has also helped us to increase our drug revenue substantially."

Graham Miles, Partner at Quantum Air Technology said:

"We are pleased that the P.C.I is working well at Spire Bushey hospital, and seems to meet all the requirements of the pharmacy. The P.C.I was originally designed for aseptic work on hospital wards but is suited to a wide range of applications, particularly where budget is limited or space is at a premium. Much work has gone into its design to make it easy to use and ergonomically comfortable, so it is rewarding to get this type of reaction from customers. The P.C.I incidentally can also run in Class 3 high containment mode, and is being used by the military for pathogenic applications."

Quantum Air Technology provide a wide range of clean air and containment products and services across Healthcare, Biotechnology and Defence market sectors and would be delighted to discuss your requirements. Contact us:

Quantum Air Technology Ltd. Unit 1 Victoria Way, Rawtenstall, Rossendale, Lancashire, BB4 7NY.
